

Appendix 10

Company Quality Standards

Ridgeway Plumbing will comply with all code requirements, manufacturer's installation instructions, industry standards, and contract documents. In addition, we will incorporate the following quality improvement features into our plumbing systems:

- Maximum ½-inch tolerance on layout measurements
- Minimum ¼-inch per foot pitch on all drain lines – twice the code minimum
- Pre-fabricated components such as tub/shower valves and underground drain lines
- PEX water piping preferred, run overhead, to the extent possible
- Over-sized stud guards
- Lockable main shutoff valves
- Tamper seals at all fixture connections
- One-piece flexible fixture connections
- Pressurize water systems to 120 psi (copper/CPVC), or 200 psi (PEX)
- All open pipes capped
- Trained, cooperative, drug-free workforce
- Flexible bathtub wastes
- Hold-rite straps on hose bibbs for rigidity
